

Business Performance KPI Dashboard

Project Overview | Power BI | Maincrafts Technology — Task 2

Project Overview

This project presents a Business Performance KPI Dashboard created using Power BI. It analyzes sales, profit, customer segments, regional performance, and seasonal trends using the SuperStore Sales Dataset.

Dashboard Features

- Total Sales KPI
- Total Profit KPI
- Profit Margin KPI
- Total Customers KPI
- Sales by Region (Bar Chart)
- Profit by Category (Column Chart)
- Monthly Sales Trend (Line Chart)
- Top Customers Table
- Sales by Segment (Pie Chart)
- Interactive Filters / Slicers

Business Analysis

The dashboard helps answer key business questions such as:

- Which region generates the highest revenue?
- Which category has the highest profit margin?
- Are discounts reducing profitability?
- Which customer segment is most valuable?
- Is there a seasonal sales trend?

Tools Used

- Power BI
- Microsoft Excel
- SQL (for data analysis)
- SuperStore Sales Dataset

Key Insights

- **Central** region generated the highest sales revenue.
- **Technology** category achieved the highest profit margin.

- Discounts above **20%** reduced profitability.
- **Consumer** segment contributed the highest total sales.
- **Q4** showed the strongest seasonal sales performance.

Files Included

- Power BI Dashboard (.pbix)
- Business Summary Report (.pdf / .docx)
- Dashboard Screenshot
- README.md

Project Outcome

This project demonstrates skills in data visualization, KPI analysis, business intelligence, and dashboard design using Power BI.
